WITH such testimony, no stronger proof can be given unless it be trial of this wenderful Hampton's Vege table Tincture. dess it to sture.

Grant County, (Md.,)

Barrellville, Allegany County, (Md.,)

May 4, 1862.

May 4, 1852.

Dram Sins: In justice to Dr. Hampton's Vegetable Tincture, I wish to inform you that I was taken sick on the 3d day of January last, with an affection of the stomach, bowels, and kidneys. I was attended by four eminent physicians for more than two months—all to little er no effect. I had some knowledge of the great virtue in Hampton's Tincture from one bottle which my wife had taken two years

ture from one bottle which my whe has teach we years since.

I came to the conclusion that I would take no more medicine from my physicians, but try the Tincture; and I am happy to inform you I had not taken it two days before I felt its powerful influence upon my stomach. I have continued osing the Tincture, and am now able to leave my room, and can eat any common diet without much inconvenience or pressure on my stomach.

The afflicted or their friends are daily visiting me, to learn of the great virtue there is in this Tincture of Hampton's. I expect to send you several sertificates in a few days—one especially from a young lady who has been confined to her room twelve months, with a disease of the head, affecting the brain.

the brain.

Respectfully yours,

E. W. HALL. On the permancy of the cure hear him. Still another letter from the above!

BARRELLVILLE, ALLEGANY COUNTY, (Md.,) October 13, 1852.

October 13, 1852.

Meerrs. Mortimer & Mowbray:

DEAR SIRS: I am happy to inform you that this day finds me in the enjoyment of good health, by the use of your Hampton's Tincurre and the blessing of God. I am enabled to pursue my daily avocations as usual, and I have a great desire that the afflicted should know the great curative

powers of the Tincture.
I am, with respect, yours, E. W. HALL. THE ALMOST MIRACULOUS CURES made by Hampton's Vegetable Tincture on our most respectable citizens—men well known and tried—we challenge the world to show anything on record in medicine to equal it. Many hundreds who have felt its healing powers bear the same testi-

hundreds who have felt its healing powers hear the same testimony.

Baltimore, July 6, 1852.

Messrs. Mortimer & Mowbray: Gents: Last September I was attacked with erysipelas, from which a dreadful ulcer formed on my right by. Getting better of this, last November I took a deep cold, which led to what my physician told me was billions pleurisy, which left me with a constant, deeply-seated, and painful cough, having no rest day or night, and constantly throwing up from my lungs a thick matter. I became much emaciated, growing weaker every day, and keeping my bed the greater part of the time. My friends thought I had the consumption, and at times I was also of the same opinion. At this stage of my disease, after having tried many and various remedies, without success, a friend advised me to try DR. HAMPTON'S VEGETABLE TINCTURE, and procured me a bottle, which I now promounce the greatest medicine I ever took. Before I had taken half the contents of one bottle I felt much improved; and now, having taken but two bottes, my cough and pains have entirely left me, and I am enabled to attend to business. I can truly say that, with the blessing of God, I have been restored to the health I now enjoy by the use of this most invaluable medicine.

Schroeder, near Saratoga street.

Truth stranger than Fiction !- None need despair !-A Lady's Testimony after thirty-eight years of suffering!

of suffering!

Were there not real virtue in this wonderful medicine, could it perform the actonishing cures made by it?

Normamprox Co., April 13, 1852.

Messrs. Tyler & Adair: I have been afflicted with Rheumatism, at times, from my twelfth year; I will be fifty years of age the 18th of this month; the attacks were at times so severe as to render me helpless; I have tried various remedies to very little effect. Last October I was attacked in my shoulders, sides, back, and hips; I could not rest, day or night; I could not move anywart of my body without crying with pain; at this time I also tried many remedies, internal and external, without receiving any relief; I was at last advised to try HAMPTON'S VEGETABLE TINCTURE; before I had taken one bottle of which I felt much better, and as I continued taking it I felt strength coming into my back and limbs, and my stomach strengthened and revived every way; I have taken five bottles, and am much better than I ever expected to be. I intend to use it whenever I need it, and would recommend it to the afflicted, believing it unequalled.

ELIZABETH BAGWELL.

MEY. VERNON ESKRIDGE, U. S. N.

POSTSMOUTH, (Va.,) Aug. 18, 1851.

Mr. J. E. Boush—Dear Sir: While I am in general opposed to Patent Medicines, candor compels me to state that I have great confidence in the virtues of Hampton's Vegetable Tincture. For several months past I have used it in my family, and in Dyspepsia, loss of appetite, dizziness, and general debility, with entire success. So far as my experience extends, therefore, I take pleasure in recommending it to the afflicted as a safe and efficient remedy.

I am, respectfully, yours,

Chaplain in the U. S. Navy.

THE LOST SENSES: DEAFNESS AND BLIND-NESS. By Dr. Kitto.

NESS. By Dr. Kitto.

"This is a work of great interest, from one of the most learned and accomplished writers of the age, revealing the mysteries of the world in which those live who have been deprived of the sense of right or hearing. Ever since his boylood, for more than thirty years, Dr. Kitto has passed a life of great activity as a scholar, in a state of the most intense deafness to which any living creature can be subjected. His account of himself, and of his discriminating remarks on the condition of the blind, (James Mitchell, Laura Bridgeman, and others), are replete with profound thought on the interesting phenomenon presented in the progress of their mental training."—Christian Observer.

MACHINE FOR CRUSHING, GRINDING, AND PULVERIZING.
Recently Patented in this Country and Europe

Recently Patented in this Country and Europe.

COCHRAN'S PLANOSPHENICAL QUARTZ CRUSHING AND PULVERLEING MACHINES are now in daily operation for the
inspection of the public, and will be submitted to any reasomable practical tests proposed by parties interested.

These machines, by their simplicity of construction, their
durability, the undoubted principles upon which they operate, their effective operation and result, are justly entitled
to the consideration of all parties engaged in grinding,
crushing, and Pulverizing Quartz, from Ore, Zinc, Copper,
and Lead Ores, and all other Ores or Mineral substance.

It is the peculiar feature of the economy of these machines that they are found capable of crushing and pulverizing into the finest powder any amount of Quartz or other
earthy matter, in proportion to the amount of weight or
power applied. The earthy matter is so completely ground
and pulverized, that the Gold may be easily separated, and
subjected to any process of smalgamation that may be necessary.

The mechines work and deliver wat or drive as new here.

Cessary.

The machines work and deliver wet or dry, as may be required, and run with little friction, (being almost without machinery,) requiring no lubricating; the principle upon which they operate precludes the possibility of their being put out of order; nor do they heat any material while being pulverized. They are at once applicable for all purposes of rinding and pulverizing, from those required by the Druggist to those of the most extensive operations in California and Australia.

gist to those of the most expensive operations and Australia.

These machines are from two to twelve feet in diameter, with balls or spheres from three inches to five feet in diameter, each machine weighing from 250 pounds to 20 tons each, and are sold, with the right to use them, at from \$100

any desired amount of power may be used, from that of a man or horse upward.

The proprietors of this invention solicit examination, and will prove by practical tests the vast superiority and economy of these machines over any other, for crushing, grinding, or pulverising, heretofore offered to the public.

These machines may be seen in operation at the foot of South Eighth Street, Williamsburgh, at the large Patent Block and Saw Factory of Messrs. Burr, Waterman & Confirst street south of Peek Slip Ferry, every day, from 7 to 9 a.m., and from 4 to 6 p.m. For further particulars, apply to

32 Cliff street, New York.

Mechanics, Manufacturers, and Inventors.

Mechanics, Manufacturers, and Inventors.

THE Eighth Volume of the SCIENTIFIC AMERICAN commences on the 18th of September. It is principally devoted to the diffusion of useful practical knowledge, and is eminently calculated to advance the great interests of industry—Mechanical, Manufacturing and Agricultural—the genius and master-spirit of the nation.

It is unrivalled as a Journal of the Arts and Sciences, and maintains a high character at home and abroad.

The publishers pledge themselves that the future volumes shall at least equal, if not surpass their predecessors. Among the subjects chiefly brought forward and discussed in its columns, are Civil Engineering, Architecture, Rail-roads, Bridges, Arricultural Implements, Manufactures of Metals, Fibrous and Textile Substances, Machinery for the purpose, Chemical processes, Distilling, Coloring, &c., Stann and Gas Engines, Boilers and Furnaces, Mathematical, Philosophical and Optical Instruments, Cars, Carriages, Water Wheels, Winds and Grinding Mills Powers, Planing Machines, Tools for Lumber, Brick Machines, Farming, Fire Arms, Electricity, Telegraphs, Surgical Instruments, &c., besides Claims of all Patents, Keviews, Notices of New Inventous, American and Foreign. The work is in form for binding, contains several hundred Engisvings, over four hundred pages of printed matter, and a copious Index. Nearly all the valuable Patents which issue weekly from the Patent Office are illustrated with Engravings in its columns, thus making the paper a perfect Mechanical Encyclopedis for future as well as present reference.

Valuable Premiums are offered for the largest list of Subscribers to this Volume. It is published weekly by MUNN & CO., at their Patent Agency Office, 123 Fulton street, New York.

TERMS-ALWAYS IN ADVANCE.

KRAUSER'S PATENT CLOVER-SEED HAR-

KRAUSER'S PATENT CLOVER-SEED HARVESTER

IS BEFORE THE PUBLIC FOR THE FIRST TIME
IS utility is beyond comparison with any other farming
implement now in use. It takes the seed from the field,
leaving the straw or grass all standing. It weighs two hundred and fifty pounds, is drawn by one horse, and gathers
from ten to iweive acres per day. The fingers, or teeth,
catch all the heads, the revolving knives cut them off and
throw them back into the box, which will cross a twentyacre field without emptying. The heads are then loaded
into a wagon and taken directly to the mill for cleaning,
thus diminishing the labor three-fourths, and saving all the
seed. This machine comes so low that every farmer will
have if, and pays the manufacturer 300 per cent.

E. WHEELER, Agent for Washington.

WILLIAM P. GARWOO WM. C. NICHOLSON, JOHN F. COOK, JAMES B. COOK, JAMES COLLINS, CHARLES LEWIS, JAMES BRYSON, PETER H. JONES THOMAS TUMBLESON.

Long-a-Comino, October 7, 1851.

This is to certify that Mr. G. J. Naylor has gathered clover off of a sixteen-acre field of mine, which has been pastured two months with ten head of cattle, and it produced six bushels and a half and one peck of seed. I gave him two-thirds for gathering and cleaning. I think his machine is first-rate, and answers all the purpose that is intended. The following points out the profitable nature of the Harvester:

arvester: KRAUSER'S PATENT CLOVER-SEED HARVESTER.-

200

Cost of harvesting, &c., 1,000 acres\$500

ave found them to agree a plant of the property of a profitable investment than the Harvester. For an enterrising young man, of good business habits, a large sum of
noney could without doubt be realized from the sale of
fights in the different States of the Union not yet disposed
of. By calling at this office, it can be demonstrated satisfactorily that men of moderate capital could not choose a better
or more money-paying business.

DISCOVERED AT LAST!

M. R. SCHLESSINGER has invented a bletallic Pen which supplies a want long existing. It is conted with gutta percha, and most effectually resists the corrosive properties of the ink, and, being pointed with platina, has all the flexibility and smoothness so desirable in writing. It is equal in all respects to the most highly finished diamond-pointed gold pens, and is to be had at a price so reasonable that it must come into universal use.

This highly useful and desirable pen has been tested already in this city in engrossing on parchment, and in the ordinary business writings, and its superfority is fully admitted.

The sole agent in this city is

JOE SHILLINGTON, oct 7

Odeon Building, cor. 4½ st. and Ps. av.

Transition Coal.

This rare and valuable Coal is a variety not quite changed into an anthracite, and it has only been discovered (in large quantities) at three places upon our globe, via: at South Wales, Great Britain; at Donetz, in Russia, near the Black Sea; and at Dauphin and Lebanon counties, Pennsylvania. In the London market this coal commands the highest price. It is now mined upon the large estate (43,000 acress) of the Dauphin and Suaquehanna Coal Company, situated in Pennsylvania, and it is nearer to the cities of Baltimore and Washington than the coal of any other region. For easy lgnition, durability of fire, complete compustion, easy adaptation to the temperature of the weather, and its great power in generating heat, it is the near coal in the world. It has the inflammability of the bituminous coal, with the cleanliness of the anthracite, and a greater durability than either. It burns without making any soot or visible smoke, and the combustion is so complete that it retains the fire until all the coal is consumed. Not so with the anthracites, especially the hard and heavy kinds. They do not burn up, and hence the common troublesome practice of siting their ashes to obtain more feel. In burning the Transition Coal there is no vaste, for the small coals made by handling, burn as well as ordinary coal. All rhould be burned together. If screened at all the dust only should be taken out.

taken out.

A very erroneous impression exists with many persons that the heaviest coals are the most economical for ordinary purposes. This might be the case if coals were sold by measurement, but never when they are sold by witour. In Taylor's valuable work, (Statistics of Coal.) the details are given to show that 31 pounds of a free-burning red ash yielded more heat to a room in 15 hours, than 37 pounds of a heavy white ash coal, making the red ash, at \$5 50, to be more economical than the white ash at \$4 50 per ton. Any person accustomed to use these heavy coals will be astonished at the saving which can be made in burning the lighter kinds, when tested by the weight and burnt in a suitable manner.

An apprehension exists with come that

isbed at the saving which can be made in burning the lighter kinds, when tested by the weight and burnt in a suitable manner.

An apprehension exists with some that the free-burning coals have a tendency to clinker. Now, as a general rule, no coal will clinker unless a greater draught be applied to it than the coal naturally requires. No one would think of applying a bellows constantly to a fire made of seasoned hickory or oak wood, and it would be equally as absurd to apply a blast constantly to a free burning coal. But the heavy white sah anthracites cannot be burnt without a powerful draft, and without using a larger quantity of coal than the temperature of the weather sometimes requires. Various patterns of stoves, furnaces, cooking ranges, &c., are invented annually to conquer this difficulty, but it has never been done with complete success. In every contrivance, however, which has been invented to burn coal, the transition variety will make a beautiful fire, and no complaint will ever be made to a manufacturer or seller of grates or stoves when this coal is used. The draft alone is to be regulated by a damper. In introducing this new coal for the first time, prepared as it now is by steam power machinery for domestic use, it may give greater confidence to the buyer to say that the celebrated free-burning red ash veins in the Peach Orchard district, near Pottsville, are a continuation of the Duuphin veins, and they approach the nearest in value to the Transition coal.

Shipments of the Transition coal have already been made to the District of Columbia, and it can be obtained at retail from the following persons:

Wm. T. Dove, Washington.

F. Magruder, do Hunsberger & Co., do Wm. Warder, do Myers & Baker, Georgetown.

Orders for this coal by the cargo, as well as for the semituminous and anthracite coals, mined by the Dauphin and Susquehanna Coal Cempany, will be promptly executed by ADAMS FOSTER, Agent,

DENTISTRY.

DENTISTRY.

DR. CASADA VANT, Surgeon Dentist, formerly from Paris and New York, returns his incere thanks to the citizens of Washington and Georgetown and vicinkies for the liberal patronage which they have extended: or in since he has established himself in this city, and would inform them that he has removed to Lane & Tucker's building, on Pennsylvania avenue, between the National Hotel and 4½ street, where he still continues to perform all operations in his profession in a superior manner, at New York prices, so as to enable all to test his skill, and he warrants his work to be equal to that of the best Bentists. As he manufactures his own artificial teeth, he is enabled to suit all cases, and will undertake to perform all those operations in which other Dentists have failed to succeed. He will refer to many citizens of Washington and Georgetown, for whom he has performed operations.

metal; with the several acids, there was very slight—a fact sufficient to show that atmospheric influences would have no sensible effect.

JOHN LECONTE, Prof. of Nat. Phil. et Chem.
UNIVERSITY OF GA., October 8, 1850.

The Lightning Conductors of Mr. Spratt, offered to me, are well calculated to perform the office for which they are intended. Yours, truly, Prof. ROBT. PETER.

LEXINGTON, KY., February 20, 1850.

This may certify that I have examined, somewhat critically, James Spratt's Patent Lightning Rods, and that I am of opinion that it is constructed on scientific principles. For combining durability, cheapness, and efficacy, I deem it equal, and I think superior, to any other rod ever offered for my inspection.

Augusta, (GA.) November 11, 1850.

This will certify that I have examined the Lightning Rods, Metallic Points, and Isolating Attachments, manufactured by Mr. Spratt, and regard them as constructed in conformity to the general laws of the electric fluid; and the metallic compound constituting the Points, as promising, from the result of several tests to which they were submitted, to resist for years the action of those atmospheric causes most likely to carrode them.

The Lightning Conductors put up by Mr. Henry M. Smith, of this city, on the plan of Mr. Spratt, appear to me to be very well devised; and, in point of mechanical construction, are the best I have ever seen.

It is to be hoped that the use of these Rods may become general, as an important suxiliary defence against a danger which must be regarded as of no ordinary magnitude, to which all buildings are liable.

R. SHLIMAN, Jr.,
Prof. of Chem. in the University of Louisville.

A BOOK FOR THE TIMES.

HELPS to a 'life of Holiness and Usefulness, or Caughey's Ravival Miscellanies. The demand for this book is almost unprecedented in the history of Methodist publications. Six thousand copies have been sold in about four months. The seventh thousand is now ready. Read these

months. The seventh thousand is now ready. Read these notices of its character:

"These sermons are admirably fitted for producing effect, immediate, powerful effect, upon the popular mind. Brief, fitting, bold, subjective; abounding in aneadote, illustration, cathos; never prosy; never halting for a moment in confident persussion that sinners are to be converted by the truth they pres home. " * "We unhesitafingly recommend the circulation of this book."—Rev. Dr. Wightman, Ed. S. C. Advocate.

"It is a good work, and all that have bought it my so. One * " very good brother said, after reading the sermon on the 'Omnipotence of Faith,' that it gave him more of an insight of faith than anything he ever read or heard. A Baptist minister purchused a copy, and was carried away with the spirit of the work."—Rev. Theodore Hill, of the Asire Conference.

"I like iterival Miscellanies very much. It will do good in the church."—Rev. G. M. Carpenter, of Providence Conference.

"I have read the book and any vot only delicited, but

in the church."—Rev. G. M. Curpenier, by I reducine deference.

"I have read the book, and am not only delighted, but feel that I am a better man. All who have read it are greatly pleared."—Rev. T. Sullina, of the Holston Conference.

"This book has been a great blessing to my soul. It has fired up my zeal, and I feel like working for the Lord as I never did before."—Rev. J. H. Monigomery, of Alabama.

"We shou!" hardly think it possible for any Christian to read this volume without partaking largely of that holy unction which breather and burns on every page."—Rev. Richard Donkersley, of the Frondence Conference.

sep 29

GRAY & BALLANTYNE, 7th st.

Protection from Lightning.

Protection from Lightning.

THE undersigned, being the duly appointed Agent of Spratt's Electrican and Electro-Metallurgist Lightning, of Spiral-twisted, Carbonized Annealed Iron, with Zinc Protectors, and Electro-positive elements combined in their manufacture; thus rendering them equal to copper as conductors. They are in ten-feet lengths, with accurately-fitted brass-screw connecting joints, an entire new style of metallic (patented) attachments, for brick or frame buildings; also, glass isolaters, of a novel and ingenious construction, (patented,) forming a lock; the whole mounted with a solid platinum silver point, (patented,) twelve inches long, surrounded at the base with three angular negative magnets, which possess the power, to an extra-ordinary extent, of discharging the opposite elements of the most fearful thunderstorm, and embrace the entire perfection of science up to the present time; the whole constituting the most magnificent and perfect silent conductor ever presented to the public.

Safety has not been compromised by affording these excellent rods at such low rates; the greatest attention has been given to their construction, so as to be readily attached. The astonishing power of the negative magnets, in discharging the air of its opposite elements, has been clearly demonstrated by the Electrometer, when unmagnetized points have shown but slight results, though placed under the same conditions. In fact, they gather and silently discharge electricity from the atmosphere when you would scarcely suspect any being present.

These improvements being secured by double letters patent, you are hereby cautioned against laying yourselves liable, by purchasing of those who are not authorized, or who are substituting inferior imitations. All agents duly appointed can show their certificates. Have good rods or none.

CHARLES W. HEYDON, Washington City.

I do hereby certify that I have spp lied various powerful changing reasonts to Spratt's Patent Engine.

I do hereby certify that I have spp lied various powerful chemical re-agents to Spratt's Patent Points for Lightning-Rods, and that the results of these experiments convince me that they will resist the action of atmospheric causes, and thereby preserve the extremity sharp—a condition most essential to protection against lightning. The re-agents used in the above experiments were a solution of chlorife of so dium, (common salt.) acetic acid, sulphuric acid, and hydrochloric acid. With the first, there was no action on the metal; with the several acids, there was very slight—a fact sufficient to show that atmospheric influences would have no sensible effect.
